

NDS Decorative Drainage

+ Grey Wave Grating

NDS Decorative Channel is ideal for residential or non-residential applications that anticipate moderate amounts of drainage water. The NDS Decorative channel is excellent for light duty applications including pools, patios, spas and tennis courts. It offers a number of coloured wave pattern gratings to choose from, including Black, Grey, and Tan.

Accessories

Connectors need to be used when connecting each channel to the next. So for every extra channel you have you will require a connector.

End Caps are used at either end of the run to stop the flow of water.

End Caps Outlets are used at either end of the run to allow a pipe to be connected and water to be drained.

Corner Units can be used to make 90 Degree angles between channels so that you can take your channel round corners, you won't have to cut your channel.
